AUTOMOBILE FATALITIES.

announces that reports of auto mobile fatalities for the four week period ending September 11, have been received from seventy-eight large cities in the United States. The total number of fatalities in these cities were 660 as contrasted with 561 for the corresponding four weeks of 1925, and the daily average for the two four-week periods were 17.9 and 16.6 respect-

· A great many of these tatalities could have no doubt been avoided. With the elimination of excessive specd, strict observance of traffic regulations these unnecessary deaths could be reduced. People are in the habit of being in too great a hurry and take too many chances driving motor cars Of conrse some accidents are unavoid able but the majority could have been avoided it the drivers had been a little more careful and observed all regulations controlling the operation of motor vehicles.

THE PECAN, AN UNDEVELOPED RESOURCE.

A money crop that so far has development in Navarro county is pecan culture. There are a number of farmers who are realizing on the pecan crop but there is much room for expansion of this industry in Navarro county, according to men who have made a study of nut growing. There is always a market for pecans and the nuts atways bring good money. It is the opinion of many that Navarro county could be made one of the leading pecan producing countion with pecau culture in this loge boy at all.

county, Mr. M. W. Beck, who is now making a soil survey of the county, gives some interesting observations. "During the soil survey or Savarro county, it has béén observed that there are many, fine native pecan trees in the county." Mr. Beck points out. "These trees in most instances produce nuts of small size and inferior quality These native trees can be budded good varieties and produce high

auality, commercial nuts'in a few cears. San Saba county in a good rear produces over 2.000,000 pounds of marketable pecaus and s known all over the nation for her high quality pecans. San Saba realizes about \$300,000 cash for her pecan crop alone. "Navarro county has thousands

of acres of overflow laid, which is the natural habitant of the neces, and is used for pasture and timhers only. It appears that these now practical inneconomically used soils could be practically planted to pecans. Even in the densely timbered bottoms it would probably be economically feasible to clear out sufficient trees to plant pecans and in the future have a cash income from a now undeveloped rechanges coming to the editor's desk source. San Saba county's main producing pecan soil is on over pletely surrounded by county fairs. I flow land very similar to the lands "Everybody's doin it" and making along the Trinity river. Chambers a success of their efforts, that is and Richland creeks. What San with the exception of Navarro Saba county has done Navarro county. Under a Tyler dateline county should attempt to do." is

Mr. Beck has made a very closstudy of the conditions in Namost the entire region it repre varro county and his findings are sents." From Sherman in a story worthy some serious thought by the land owners of the county who have land naturally adapted to the raising of pecaus. Several huntrict Fair." and the interior were reported down. Property loss at Vera Cruze was estimated at 5,000,000 pesos. Damage to small shipping in the iarbor was considerable.

Porto Rico Storm Moderate. Ry Asosciated Press.

Washington, Sept. 29.—The tropical disturbance reported yesterday several hundred miles north of Porto Rico has apparently moved west northwestward, the Weather Bureau announced today.

There were no indications, however, it added that this disturbance

is more than slight or of moderate intensity."

Location of the storm which caused heavy damage at Vera Cruze and neighboring territory yesterday was not reported by the bureau today. It was described, however, as of onsiderable intensity.

A later report issued by the Bu-

reau said the tropical disturbance apparently was central about 27 North and 71 West, moving north-west or west-northwest.

Damage Overestimated.

By Associated Press.

Vera Cruze, Mex., Sept. 29.—A staff correspondent of the Associated Press arriving in Vera Cruze today found that the city had not been as severely damaged by yesterday's hurricane as was indicated in some of the first reports.

No Americans or other foreigners were killed or injured. The total casualties thus far reported are the drowning of two Mexicans.

Jim Wells Defies State to Show Cotton Yield Exceeding Own

Alice, Texas, Sept. A.-Jim Wells county, one of Texas' youngest in point of agricultural development, has issued a challenge to the entire state for lany county to show a greater average yield of cotton per acre over the entire county without use of fertilizer or irrigation during the year 1926.

The gin's in the county have been taxed to the lim-

it, running day and night and Sundays, handling the crop which is three times as great as any previous crop, and consequently greater than the ginners anticipated. Much of this increase is due to the amount of new land which has been converted into farms during the past 12 months. Land which was still covered with its native of mesquite and

cactus 12 months ago

producing in excess of half a bale of cotton per acre. Cotton pickers are more plentifuli as the narvesting of the crop in the lower val-ley nears an end. Three more weeks of fair weather will terminate the gathering

of the crop here.
The county which accepts the Jim Wells challenge will have to show an average of in excess of five-eights of a pale per acre without use of fertilizer or irrigation.

This news item was clipped from the Corpus Christi Caller.

Sinclair Automobile Soap is a proven product of quality

The fast growing demand for SINCLAIR AUTOMOBILE SOAP and the good will this quality product is building, can be readily expressed by quoting the following letters: •

AUTO LAUNDRY AND STORAGE WAUKESHA, WIS.

Sinclair Refining Company, Chicago, Ill.

Approved: C. M. Larson,

Supervising Engineer,

After trying various brands of soft soaps, we find that SINCLAIR AUTO-MOBILE SOAP has given us the best satisfaction. It lathers readily in hard water and we find it to be more economical than other soaps.

Auto Laudry & Storage

WESTERN AVENUE AUTO SALES CORP. CHICAGO, ILL.

Sinclair Refining Company, , Chicago, Ill.

February 28, 1926. 🥞

Gentlemen: One day about two months ago your salesman came in and wanted to sell us some soap for our wash rack. Up to that time we had never used any SIN-CLAIR SOAP, and he had quite a time convincing us that we should quit using the brand we had been buying for so many years; however, we gave him an order for a barrel and thought we would take a chance.

We want to compliment you for salling us the best soap we have ever used, as we find that it goes further and does not hurt the body finish in any way, so far as we can see.

We have instructed our purchasing department to use only SINCLAIR SOAP in the future.

Yours very truly, (Signed) J. B. Hamby, Manager.

Sinclair Refining Company, 45 Nassau Street, New York City, March 4, 1926.

BOLL WEEVIL GIVEN BY ENTOMOLOGIST

FALL WILL INCREASE YIELD | ED TO MORE THAN DOUBLE **NEXT FALL**

"Kill the boll weevil," seems to Special to the Sun. leas and other insects have been mologist of the Texas A. & M. College gives the following suggestions to the farmer through the

Considerable interest is being heir attention to this important

y until it goes into winter quarters about the time of the first killing cotton any measures that will de-stroy the life of the cotton plant for a considerable period before the irst killing frost will starve many individuals, while others enter wincondition that practically all die

The boll worm in late fall burrows two to five inches beneath the soil surface of the cotton or the corn field and there builds a comparatively weather proof cell from which the boll worm moth emerges the following spring to lay eggs for a new brood of worms. Deep plowing in fall and early winter exposes these resting forms to weather conditions and to birds, so that infestation by the insect the following season is lessened.

A disease that attacks Texas cot-

ton every year and that has been especially important the past season is that known as root rot Plow-ing so accomplished in the fall that the roots are exposed to complete drying will go far toward reducing damage by this the following sea-

Besides the ones mentioned, fall and winter cultural measures such is have been recommended for a number of years by the Extension Service will destroy many other species of insects injurious to cot-ton and other crops. In brief the neasures recommended are: (1) The prompt plowing under of

the cotton or other crop as soon as soon as harvesting has been comleted; where cotton root rot is oncerned it will be best to expose

In a recent issue of LIBERTY, a magazine which evidently gives more attention to increasing its circulation than it does to verifying statements printed in its columns, some comparative figures regard. ing the production of the Ford Motor Company for the first six months of 1926 were printed. The writer of this story used 714,000 units as Ford production for the perriod ending June 30, 1926, when as a matter of fact, an official statement of the Ford Motor Company shows that over 922,000 cars and trucks were built during that peried. This production figure does not include Fordsons or Lincolns. The difference between the figures appearing in Liberty and the official figures amounts to about two thirds of the total production of Ford's nearest competitor for the same period.

We assume that the writer of the article in Liberty had as good authority for other statements made in his inspired story as he had for the production figures.

FORMER CORSICANAN WRITES OF FLORIDA TROPICAL HURRICANE

The following letter received by he Rev. R. B. Key of Corsicana rom his son, Newburn C: Key. Pensacola, Florida, where he is atached to the U.S. Naval Station, s unusually interesting at this ime, as Mr. Key writes of the dissertions tropical hurricane which ocently visited that section. Mr. cecently visited that section. Mr. Key was at Pensacola at the time of the storm. He is a native of Navarro county and has lass nany friends in Corsicana. His

larine Barracks, Naval Air Station, Pensacola, Fla., Sept. 25, 1926. Mother, Father and "Kids."

I have just received your age, and I guess you all must be a little excited if you have read the real account of our terrible disasreal account of our terrane pisses, ter—the flood. I will begin at the beginning and tell all.
In the first place, the city of Pensacola wasn't damaged so very

nuch, but there isn't any Naval Air Station. I mean, we are just left of it. I don't know' what the outside world says about the amount of damage here in the station, but there they estimate it around \$20,000,000.

Beginning at No. 1 gate. around by the hangars, through to Main Gate, the buildings, "all of em." are torn up completely. Any where you look you see a, burst-ed seaplane. Such a sight I never aw before, only in pictures. That "would be" concrete road

to "One Gate" is covered over and up to the sides of the fence with a foot or a foot and a half of "Flor-ida sand.

This is a complete mess of ruin...
Our barracks and one or two other arge brick buildings here were hardly damaged at all.

Now about the sailors and marrines here. All of the sailors except those in town were ordered into our barracks. Be sure we had plenty of company. Also the prisoners from the brig came over under guard and "roosted" with the aid marines.

The first indications of a hurriane were Sunday morning, Sentenber 19. All the Marines were restricted to the barracks and those in town ordered back. those in town ordered back, prepared for the storm. At

proximately 7:30 a. m. Monday. Sept. 20, the bay began flooding and by 11:30 a.m. the water was hree feet deep in the barracks downstairs. Out in the station it was waist deep. Whew! and how the wind did blow! Over went shacks, small houses and towers The chapel in front of the barracks lost its entire roof. It looks like sunhouse in some garden. moving picture screen blew over haven't seen a movie since

I wish I had had some films the ny camera I surely would have aken some pictures? Perhaps? A can get some from the Navy.

I think all of West Pensacola was too high to be affected by the "waterworks from the gulf," conequently the wind did the only The wind was so strong ou could hardly hold onto any hing, much less walk in it.

There was a very sad accident will try to tell about. Yester-

I will try to tell about. Yester-day afternoon at exactly 5:30. I was sitting at my desk in the office writing. It was real quiet and still writing. It was real quiet and stin sweept for one airplane sailing real low above the station, taking ply lures of the devastated property round about. I noticed the plane began backfiring as it flew direct y over and low over our barracks e. it was making an awful noise! Vell, he must have lost control ompletely and was trying for the ater-soaked landing field a quadron six. He was flying from owards-the brig to the Commandunt's house, circling towards—the field. He undoubtedly—saw the nigh water tower and endeavored o miss it and did—but didn't see

the aerial poles to the radio station and crashed into them. His plane turned a complete flip and hit in the Commandant's yard about fifteen feet from the house between the house and the flat pole. Puff; all went up in flames (The airplane only.) If the two

were horned up alive.

Oh; what an awful mess when we saw the two men! All we could do was stand there—and watch the two burn black. One man's head was off. Soon we pulled the wreekage from them and ed the wreckage from them and lragged what was left of the fly rs out. I will never forget thi

The two were taking pictures ne a first lieutenant in the army he other a well known mechanic ivilian, from down in Pensacola was an army plane. Well, that's

that.

I am still living. I am not looking for trouble myself, but it comesuriversally. I guess. No man knows how soon he will be called to face his Maker. That plane could have fallen directly over this roof here, you know, and—well, I would not be writing to my parents

How to stop

boils. Stop the cause of boils! That's common sense—isn't it? All right. Boils thrive because the blood gets so weak in healthy, red cells that it can't throw off the impurities that get into the body, There's not enough rich, red blood

to purify the system.

Now—S. S. S. builds back the blood to fighting strength. S. S. S. builds red-blood-cells—builds them by the millions! Boils dry up!

S. S. S. is the thing. Impurities that cause boils and other skin eruptions can't stand up against the rich, healthy, red blood that S. S. S. builds. That's all there is to it. Stop boils with S. S. S. It's the way. Get it at any druggist. The larger bettle is more economical.

Feed More Hulls and Meal

The proper use of cottonseed meal in the daily ration for your live stock and poultry will make your corn, maize, oats, and other homegrown feeds go further; put your stock in better condition, and save you money.

Our present prices offer you the biggest dollars worth of feed value of any feed on the market today, besides the use of our products boost the price on every ton of seed you sell.

Our Cash Prices:

Hulls \$5.00 per ton Meal, \$1.40 per sack Cracked Cake \$1.40 per sack Our Exchange Basis

4000 pounds of Hulls and 1000 pouds of Meal, or 5000 pounds of Hulls and Meal for 2000 pounds of Cottonseed delivered

You can bring us your seed now and take your feed later on as needed—as much of either as you desire.

Ask for our booklet explaining how to feed Hulls and Meal to best advantage to all livestock. Our highest aim is to give the people of Navarro County a friendly, courteous and help ful service. Let us serve you.
